Price: from \$999

» This system is designed to give you a high performance sound system without the associated high prices. The name of the game here is smart system design without sacrificing sound or equipment quality. The Diamond Audio D363 component speakers and D363i coaxials are a true 6 driver, and are a bolt-in fit for most cars here. The D1 series amplifiers are the heart and soul of this system, the black anodised

heatsinks not only look classy but ensure your amps run as cool as they look. No system would be complete without a potent subwoofer system – and a pair of Digital Designs 512a subwoofers are the perfect match for this system. (Enclosure designs to get the very best from any DD woofer are available on AMG's website.) Standard warranty is 12 months, but AMG will extend that to five years if installed by an authorised dealer.
